## ABOUT TRIMEDX

TriMedx is a healthcare equipment management company based in Indianapolis, Indiana. We provide medical equipment repair, maintenance, and technology services to hospitals and other healthcare facilities across the country.

Our company began as a biomedical department within the St. Vincent Health system located in Indianapolis. It was during these years that we became involved in mission work both locally and abroad.

## THE TRIMEDX FOUNDATION

Medical mission teams of doctors, nurses, and other clinical volunteers are often formed to provide care for those who cannot afford it. Unfortunately, the healthcare equipment necessary for the care is rarely available. The TriMedx Foundation was established in 2004 to partner with medical mission groups to provide and maintain the technology necessary for medical care.

There is an urgent need around the world for working medical equipment. This need exists in third world countries where medical services have limited availability and in affluent countries where those less fortunate are sometimes forgotten.

The TriMedx Foundation fulfills this need by maintaining an equipment service center, participating in medical mission trips, and providing local charity outreach. And since we support mission functions close to home and in developing countries, we make a global impact in the health and lives of others.

## YOUR SUPPORT CAN HELP

A portion of your entry fee for Mission on the Greens will go to the TriMedx Foundation to help cover mission trip costs, supplies, tools, and equipment shipping costs.

Your participation in this event means we can continue to raise funds to help the most needy communities in the world. Regardless of your level of participation, your generosity is deeply appreciated.

### TRIMEDX FOUNDATION GOLF OUTING
